

FANR Strategy 2023-2026

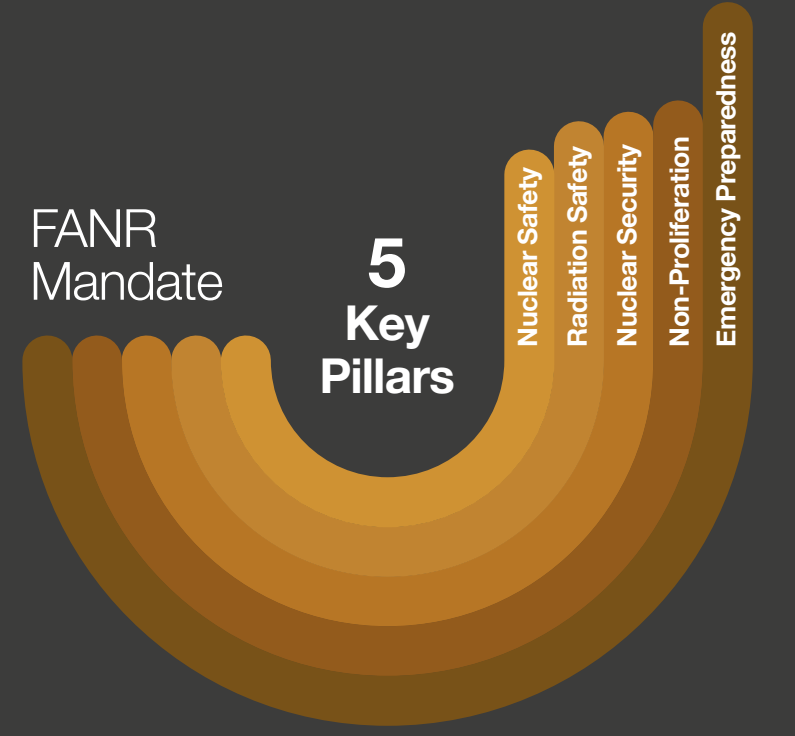

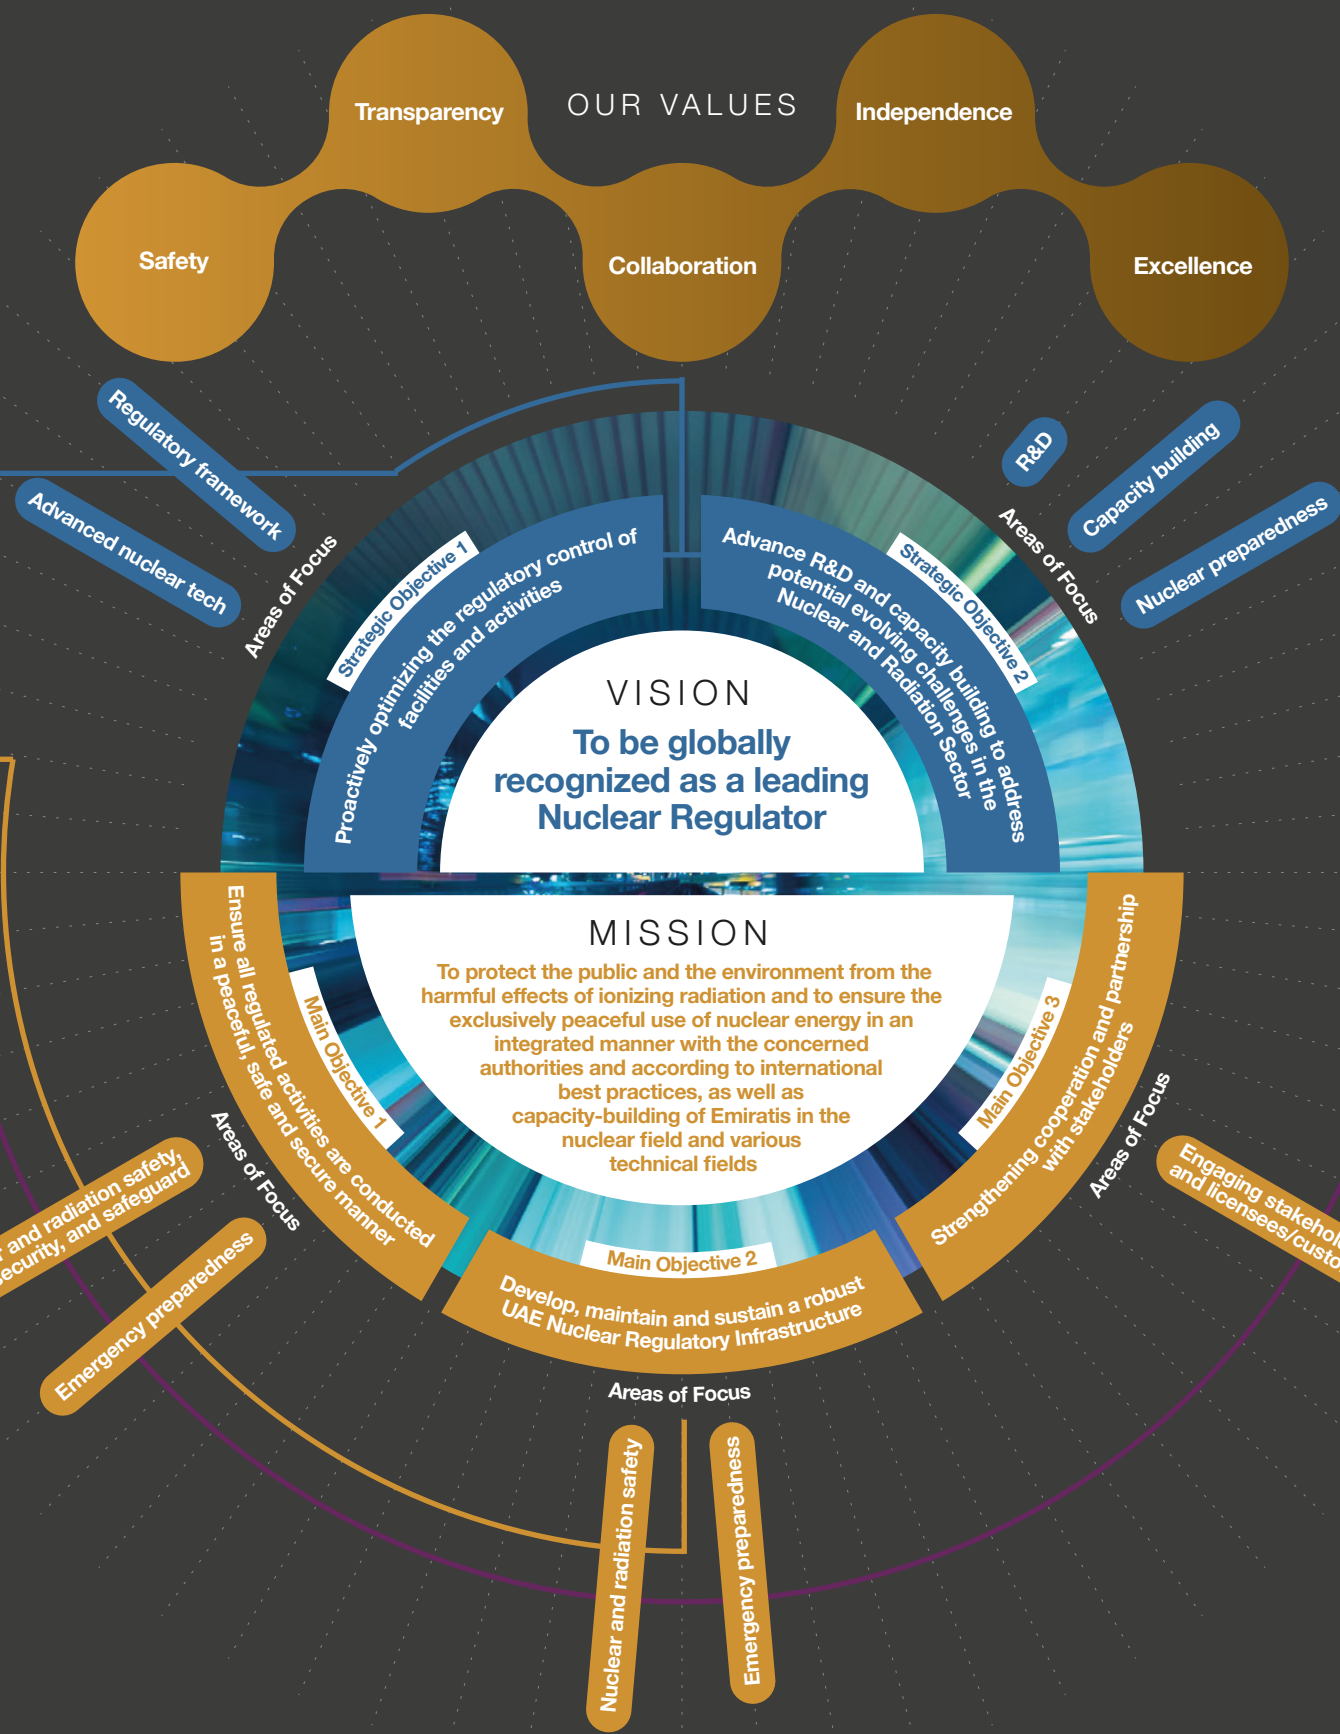

- Transformational Projects**
- National Program to Justify Medical Exposures
 - Emirates Nuclear and Radiation Academy

Transformational Objective
Achieve progress in government work, boosting the UAE's regional and global excellence and leadership.

Areas of Focus

- Radiation protection infrastructure
- Develop and sustain UAE national nuclear & radiology workforce

- Nuclear Safety**
FANR creates regulation to establish requirements with which all operators must comply and develop regulatory guides as a means of providing detailed and specific information on acceptable approaches to satisfying the requirements established in these regulations.
- Radiation Safety**
FANR ensures high standards of radiation protection for the use of ionizing radiation in medicine, industry and nuclear facilities through regulatory oversight of the nuclear sector.
- Nuclear Security**
FANR adheres to implementing international nuclear security and physical protection agreements including the Convention on the Physical Protection of Nuclear Material in line with the UAE's White Paper entitled the 'Policy of the United Arab Emirates on the Evaluation and Potential Development of Peaceful Nuclear Energy'.
- Non-Proliferation**
FANR is dedicated to preventing the proliferation of nuclear weapons through an enhanced, comprehensive and transparent safeguards system, stringent measures of physical protection and effective controls on the import and export of nuclear material and nuclear related items.
- Emergency Preparedness**
FANR requires all licensees prepare plans to respond to any emergency that could arise from regulated activities. Emergency plans must be exercised and reviewed regularly to ensure the effectiveness of the licensee's emergency response plans.
